

Product Offerings

Our product offerings focus on personal banking and responsible credit building.

Share Account

Our share accounts are savings accounts that offer higher interest than any of our competitors, partial membership of the credit union, and voting rights on credit union policies.

Share Draft Account

Our share draft accounts are standard checking accounts, giving the student access to on-campus ATMs and personalized debit cards.

Internship Loans

After 3 rounds of surveying and over 1,000 students met with, we have identified the areas where students are willing to take out small loans. Internship-related expenses that happen before a student's first pay day can be met with an internship loan.

Textbook Loans

Similar to internship loans, these loans can help students cover the cost of expensive textbooks. Students with on-campus jobs who know that they will be able to cover the payment but don't currently have the means will benefit from this.

Student Org Micro-loans

Student orgs can get short-term loans to cover the cost of their operations while they are waiting for funding from the school.

Credit Builder

Our credit building program is an effective, cheap, and risk-free way of building credit through the use of a small secured loan.
